

Make the Switch to Devo and AWS

INCREASE YOUR SECURITY POSTURE AND EL RATING WITH DEVO'S AWS NATIVE, SAAS PLATFORM

The Devo Quick Switch offer makes it easier than ever before to get rid of your old legacy logging solution and move to Devo on AWS. Let Devo take the stress out of moving over by doing all the work for you, at no cost with the lowest risk by utilizing AWS. For new customers who sign up for Devo with more than 1TB of average daily ingest, Devo will provide the professional services needed for migration at zero cost. This is the solution you need to reach your OMB M21-31 goals.

Devo expert professional services teams have mastered the art and science of helping customers like you switch to a fully cloudnative SaaS platform where you can release the full potential of all your data. Devo knows the formula for a seamless transition involves your historical data, your business-critical dashboards, your alerts, and the skills needed to put all of this vital data to work for you. Devo makes it simple for you to leave your legacy solution behind but bring your data with you by including the transfer of 90 days of your historical data where it is hot and searchable. Now is the time to take advantage of Devo's next-generation security logging platform and release the full potential of all your data. When you're ready to accept this offer, please contact your Devo sales rep or your AWS representative for more information.

Terms and conditions: devo.com/quick-switch-offer-terms

The Devo Quick Switch bundles common migration services including data migration, alert and dashboard creation, data source integration, and user training at zero cost for you.

INTEGRATION

Devo will guarantee the integration of your 25 most critical data sources, along with the creation of up to 10 real-time dashboards so you can analyze the data that matters.

CUSTOMIZATION

And Devo will make sure you don't miss a thing by customizing up to 100 alerts for all of your data.

TRAINING

Your team also will get two online training sessions delivered by Devo experts, and free access to Devo's online training library and technical certification program.
