Belkin TAA KVM dock solutions.

Secure. Certified. Connected.

Belkin TAA KVM docking stations.
Create a secure workspace with compatible, powerful, easy-to-use docks.

Docks typically add more ports to work with, but this can adversely affect security. Belkin TAA-compliant docking stations offer built-in cables and less ports, increasing security without disrupting compatibility.

Belkin purpose-built docks create a secure, expanded workspace that allows you to connect up to two displays through DisplayPort™. The KVM dock offers up to 100W of pass-through power and 1 Gbps data transfer speeds, giving you the ability to connect and work while charging your laptop.

View everything in high definition and work on multiple applications across your screens. This USB-C® dock allows you to enjoy sharper-looking, more detailed images, and visualize content across extended displays via monitor resolutions up to 4K@60Hz.

The combination of the Belkin Secure KVM and dock allows you to connect a keyboard, video and mouse, while reducing desktop clutter with a single USB-C cable connection to the host.
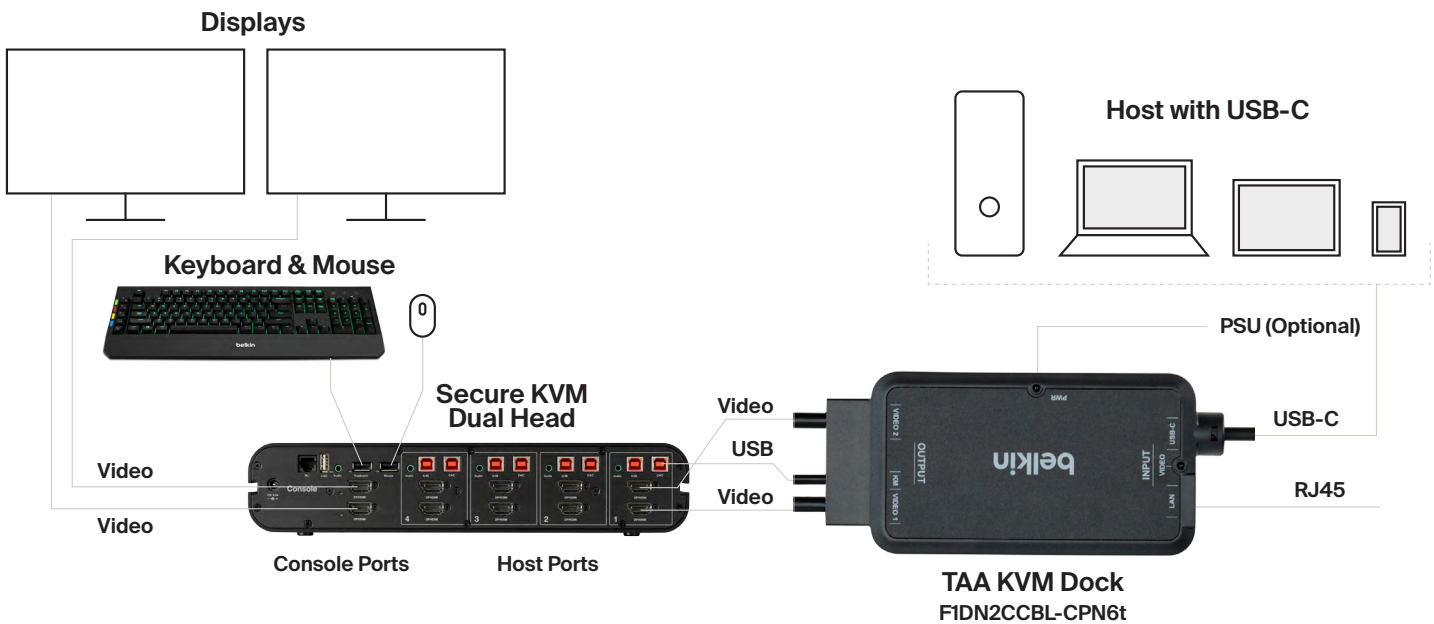

The KVM dock with integrated cables:

- Provides greater security by eliminating unnecessary docking ports.

- Reduces clutter through form factor and capabilities.

- Improves deployment and user experience by eliminating quality and performance issues from non-Belkin or aftermarket docks.

- Optimizes user experience by adding features and curbing clutter.

- Decreases SKUs required in solution, as an all-in-one dock with integrated cables.

- Reduces total cost of ownership through features.

- Gives you TAA-compliance.

- Comes with a Belkin 3-Year Warranty.

- TAA KVM Docks:

  TAA KVM Dock USB-C to (1) DP/USB-B Cables w/RJ45 and Power F1DN1CCBL-CPN6t

  TAA KVM Dock USB-C to (2) DP/USB-B , Cables w/RJ45 and Power F1DN2CCBL-CPN6t

- Host/Source Side: 1x USB-C 3.1 Gen 2 10 Gbps (male) 3 ft. (0.9m) cable.

- SKVM Side: up to 2x Display Port 1.2 (male) and 1x USB Type-B (male) 3 ft. (0.9m) cables.

- Supports video up to 4K@60Hz (single head) and 4K@30Hz (dual head).

- Ethernet up to 1Gbps network traffic, cable not included.

- Charge your laptop while working with the USB-C (female) Power Delivery 2.0-compliant port that supports pass-through power to channel up to 100W from an outlet to your device.
