

SUSE Manager for Government

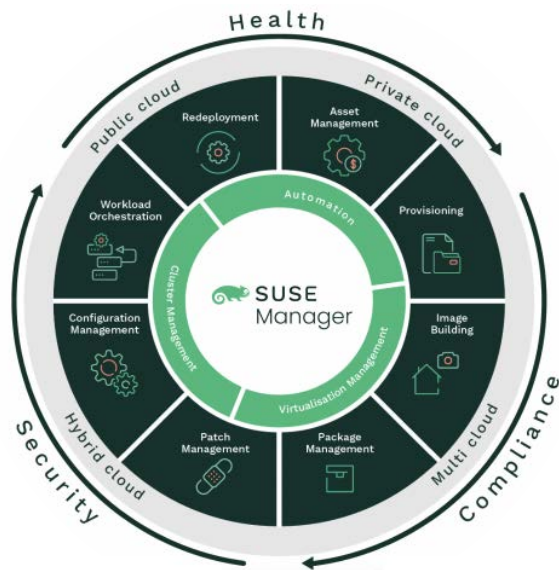

True open-source infrastructure management solution designed to simplify and secure your entire mixed Linux environment, at the core, on the edge, or in the cloud(s). Maintain infrastructure security & compliance at any scale, from 10 to 1 million clients, from a single console. Built to help your enterprise DevOps and ITOps teams manage without disruption across your entire mixed Linux infrastructure.

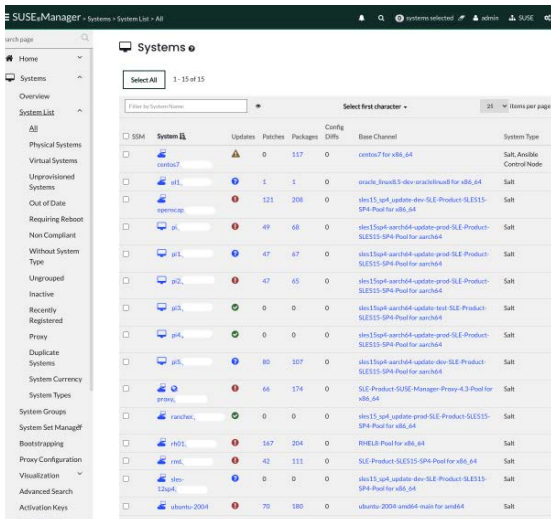

Security for the Entire Environment

Security:

SUSE Manager keeps your mission critical systems secure and compliant. SUSE Manager helps secure your infrastructure with automated patch and configuration management that provides auto-remediation. Additionally, with SUSE Manager you can validate your infrastructure against SCAP protocols and perform audit scans on client systems through openSCAP.

Manage any Linux, anywhere:

Patch Management:

- Receive notifications when the latest Linux server updates are available including program temporary fixes.
- Plan maintenance windows ahead of time by scheduling updates.
- Apply role-based controls so administrators have authority to manage assigned systems only.
- Integrate with SUSE Linux Enterprise Live patching for longer uptime and fewer disruptions.

Centralized Monitoring:

SUSE Manager includes a comprehensive monitoring solution including the option to integrate SUSE manager with Prometheus Monitoring for customers looking to leverage those monitoring solutions.

Provisioning:

- AutoYaST/Kickstart/PXE booting; virtual guests as easily as physical instances; new servers identical to a running server or predefined configuration.
- Track server changes and return to a previous version or configuration if required.
- Provision and start/stop/configure virtual guests.

Automation, Software & Package Management:

- Integration with Ansible automation with the ability to run Ansible playbooks from SUSE Manager.
- Set and schedule recurring salt states.
- Create customized repositories for the delivery of operating system packages or RPM Packet Manager-based applications and content.
- Use the SUSE Manager application programming interface (API) to create custom scripts for easily automating many tasks.

About Rancher Government Solutions (RGS)

Rancher Government Solutions is specifically designed to address the unique security and operational needs of the U.S. Government and military as it relates to application modernization, containers and Kubernetes.

RGS supports all Rancher products with U.S. based American citizens with the highest security clearances who are currently supporting programs across the Department of Defense, Intelligence Community and civilian agencies.
