Cloudera Navigator Accessibility Conformance Report

VPAT® 2.0 Version 1.0 – August 30, 2018

Name of product/version:	Cloudera Navigator version 4
Product description:	Web-based application
Date:	August 30, 2018
Contact information	gconvertino@cloudera.com
Evaluation methods used:	<p>This VPAT® is based on the results of an accessibility audit conducted by The Paciello Group – a VFO™ company, for the purpose of assessing compliance with the Web Content Accessibility Guidelines (WCAG) 2.0. The following applications were used as part of the audit to identify potential accessibility issues:</p> <ul style="list-style-type: none">● Desktop browsers: Internet Explorer, Firefox, Safari and Chrome (latest)● Assistive technologies: JAWS, NVDA, Dragon and Read & Write● Accessibility testing tools: Browser inspection tools, the Web Developer Extension, Validators, aViewer, Colour Contrast Analyser
Applicable standards/guidelines	<p>This report covers the degree of conformance for the following accessibility standards/guidelines:</p> <ul style="list-style-type: none">● Web Content Accessibility Guidelines (WCAG) 2.0 Level A/AA.● Revised Section 508.● Standard EN 301 549.

Terminology

The terms used in the Conformance Level information are defined as follows:

- **Supports:** The functionality of the product has at least one method that meets the criterion without known defects or meets with equivalent facilitation.
- **Supports with Exceptions:** Some functionality of the product does not meet the criterion.
- **Does Not Support:** The majority of product functionality does not meet the criterion.
- **Not applicable:** The criterion is not relevant to the product.
- **Not evaluated:** The product has not been evaluated against the criterion. This can only be used in WCAG 2.0 Level AAA.

Section 508 Chapter 1: Application and Administration

This VPAT is based on the [Revised 508 Standards](#) which incorporates [WCAG 2.0](#) by reference.

Section 508 Chapter 2: Scoping Requirements

As Cloudera Navigator is a web-based application, the following standards specifically apply:

- All Web Content Accessibility Guidelines (WCAG) 2.0 Level A and Level AA, available at <http://www.w3.org/TR/WCAG20>.
- Section 508 Chapter 3: Functional Performance Criteria (FPC).
- Section 508 Chapter 6: Support Documentation and Services.

Note: When reporting on conformance with the WCAG 2.0 Success Criteria, they are scoped for full pages, complete processes, and accessibility-supported ways of using technology as documented in the [WCAG 2.0 Conformance Requirements](#).

WCAG 2.0 Report

Web Content Accessibility Guidelines (WCAG) 2.0 Success Criteria, Level A

Criteria	Conformance Level	Remarks and Explanations
1.1.1 Non-text Content	Does not support	<ul style="list-style-type: none">• Non-text content that is presented to the user does not have a text alternative that serves the equivalent purpose. For example:• Various charts and graphs.• The Cloudera Navigator logo.• Some controls have graphical labels with no accessible alternative, including:• Control used to trigger the help sub-menu.• Controls to add filters.• Controls to trigger tooltips.• Controls to expand/collapse sections of content, including expandable table rows and filter controls.
1.2.1 Audio-only and Video-only (Prerecorded)	Not applicable	Cloudera Navigator contains no audio-only or video-only content.

<u>1.2.2 Captions (Prerecorded)</u>	Not applicable	<ul style="list-style-type: none"> Cloudera Navigator does not contain synchronized media with prerecorded audio content.
<u>1.2.3 Audio Description or Media Alternative (Prerecorded)</u>	Not applicable	Cloudera Navigator does not contain any synchronized media which would require an alternative for time-based media or audio description.
<u>1.3.1 Info and Relationships</u>	Does not support	<p>Information, structure, and relationships conveyed through presentation cannot be programmatically determined and are not available in text. For example:</p> <ul style="list-style-type: none"> Graphs and charts are not structured in a way that would allow users of assistive technologies to access and understand the content within each graph or chart. Some content lacks appropriate structural markup, including: Label elements are not programmatically associated with their relevant controls. Heading levels do not reflect their relative order in the hierarchy. List elements are used for decorative purposes, particularly for dividers inside submenus.
<u>1.3.2 Meaningful Sequence</u>	Supports	
<u>1.3.3 Sensory Characteristics</u>	Supports	
<u>1.4.1 Use of Color</u>	Supports with exceptions	<p>While in the majority of cases color is not used as the only visual means of conveying information, indicating an action, prompting a response, or distinguishing a visual element, there are minor exceptions. For example:</p> <ul style="list-style-type: none"> Graphs and charts often, particularly where data is presented as a line graph, rely significantly on the user being able to perceive differences in color.

		<ul style="list-style-type: none"> ● A different background color alone is used to indicate today's date within the date picker widget present on several pages across the site, such as the Data Stewardship Analytics Dashboard.
1.4.2 Audio Control	Not applicable	Cloudera Navigator does not contain any audio which plays automatically for more than 3 seconds.
2.1.1 Keyboard	Does not support	<ul style="list-style-type: none"> ● Several functional components within Cloudera Navigator are not keyboard operable or available to users who cannot use a mouse, including: ● Controls used to trigger actions, such as New Report and Common/All/None controls on the Audits page; and Create Namespace and Show Regex Tester controls on the New Property form. ● Controls to close or dismiss items, such as tags on the New Property form or main search results; recent searches on the main search input; and error messages on the New Property form. ● Controls to expand/collapse sections of content, including expandable table rows and filter controls. ● Modal dialogs, such as Filters and Date Range dialogs on the Audits page, and the timeout notification presented across the application. ● Tabbed navigation widgets, such as the Entity Details and Entity Lineage tab panel. ● Menu buttons and menu items throughout the application. ● Components within charts that display pop-ups and dialog boxes, and that filter the content of charts. ● Tooltip triggers.

2.1.2 No Keyboard Trap	Supports	
2.2.1 Timing Adjustable	Supports	Note: The session timeout notification in Cloudera Navigator provides a mechanism for users to extend the time limit; however, the modal dialog in which this mechanism is presented is not keyboard accessible.
2.2.2 Pause, Stop, Hide	Not applicable	Cloudera Navigator does not contain any moving, blinking, scrolling or auto-updating content (presented in parallel with other content).
2.3.1 Three Flashes or Below Threshold	Supports	
2.4.1 Bypass Blocks	Does not support	A mechanism to bypass blocks of content that are repeated on multiple pages, such as navigation bars and other repeated content, is not available.
2.4.2 Page Titled	Does not support	Pages do not have titles that describe their topic or purpose. The page title for each page is simply "Cloudera Navigator".
2.4.3 Focus Order	Does not support	<ul style="list-style-type: none"> ● Focusable components within Cloudera Navigator do not receive focus in an order that preserves meaning and operability. For example: ● Keyboard focus order through certain page components, such as components within the common header and side panel, is not logical and does not match the visual order of these components. ● When modal dialogs are opened, focus is not moved to the container element, nor is it returned once the modal dialog is closed.
2.4.4 Link Purpose (In Context)	Supports with exceptions	There are minor exceptions where the purpose of each link cannot be determined from the link text alone or from the link text together with its programmatically determined link context. For example:

		<ul style="list-style-type: none"> The Cloudera Navigator logo link is lacking link text.
3.1.1 Language of Page	Does not support	<ul style="list-style-type: none"> The human language of pages in Cloudera Navigator is not correctly identified.
3.2.1 On Focus	Supports	
3.2.2 On Input	Supports	
3.3.1 Error Identification	Supports	
3.3.2 Labels or Instructions	Does not support	<p>Content that requires user input frequently lacks labels or instructions. For example:</p> <ul style="list-style-type: none"> Username and password fields on the login page. Search fields throughout the application, including the main search field. Input fields within the Edit Metadata modal dialog.
4.1.1 Parsing	Supports with exceptions	<p>While the majority of markup-based content does not have any parsing issues known to have an accessibility impact, there are minor exceptions. For example:</p> <ul style="list-style-type: none"> Elements are nested in a way that is not permitted by the HTML specification.
4.1.2 Name, Role, Value	Does not support	<ul style="list-style-type: none"> The name, role, state, value of interface components, or notifications of change to these items, cannot be programmatically determined and is therefore not available to user agents, including assistive technologies. For example: Custom widgets lack accessible name, role and/or state information. These include: Disclosure (expand/collapse) widgets across the application, such as the Filters panel on the homepage, and within tables, such as within the table on the Audits page.

		<ul style="list-style-type: none"> ● Custom buttons across the application, such as the New Report and Common/All/None controls on the Audits page; and Create Namespace and Show Regex Tester controls on the New Property form. ● Tabbed navigation widgets, such as the Entity Details and Entity Lineage tab panel. ● Modal dialogs throughout the application, such as the Edit Metadata dialog on the Entity Details page. ● Charts and graphs throughout the application, such as those on the Data Stewardship Analytics Dashboard. ● Menu buttons throughout the application, such as those in the main navigation menu or the Actions menu found on various pages ● Autocomplete functionality on certain search forms, such as the search form within the common header. ● Across the application, there are instances of input fields that rely on placeholder text, and input fields that have visible label text with no programmatic relationship to the corresponding input field. In addition, there are other instances where programmatic relationships are missing between labels or messages and their corresponding controls. For example: <ul style="list-style-type: none"> ● Error messages below the login form on the login page and on the New Property form. ● Group By label not associated with select input on the Home (Search Results) page. ● Classes label not associated with control on the New Property form.

Web Content Accessibility Guidelines (WCAG) 2.0 Success Criteria, Level AA

Criteria	Conformance Level	Remarks and Explanations
1.2.4 Captions (Live)	Not applicable	Cloudera Navigator does not contain synchronized media with live audio content.
1.2.5 Audio Description (Prerecorded)	Not applicable	Cloudera Navigator does not contain any synchronized media which would require an audio description.
1.4.3 Contrast (Minimum)	Does not support	<ul style="list-style-type: none"> Cloudera Navigator includes text with a contrast ratio below 4.5:1, including placeholder text, menu button text and label text.
1.4.4 Resize text	Supports	
1.4.5 Images of Text	Supports	
2.4.5 Multiple Ways	Supports	
2.4.6 Headings and Labels	Supports with exceptions	<p>While the majority of headings and labels within Cloudera Navigator appropriately describe the topic or purpose of their related content, there are minor exceptions. For example:</p> <ul style="list-style-type: none"> Username and password fields on the login page. Search fields throughout the application, including the main search field.

		<ul style="list-style-type: none"> Input fields within the Edit Metadata modal dialog.
2.4.7 Focus Visible	Supports with exceptions	<p>While the majority of keyboard operable user interface components provide a visible keyboard focus indicator, there are minor exceptions.</p> <ul style="list-style-type: none"> Buttons throughout the application only indicate focus when hovered over using a mouse and not when focused using a keyboard. Certain controls, such as the close/dismiss button on selected tags, change color only slightly upon gaining keyboard focus. <p>Note also that only the browser's own visible indicator of focus (a dotted outline) is used around most components, which is very weak and difficult to perceive in some cases.</p>
3.1.2 Language of Parts	Not applicable	<ul style="list-style-type: none"> Cloudera Navigator does not contain changes in human language.
3.2.3 Consistent Navigation	Supports	
3.2.4 Consistent Identification	Supports	
3.3.3 Error Suggestion	Not applicable	Cloudera Navigator does not contain any components expecting user input that have known suggestions for corrections.

<u>3.3.4 Error Prevention (Legal, Financial, Data)</u>	<p>Not applicable</p>	<p>Cloudera Navigator does not contain pages that cause legal commitments or financial transactions to occur.</p>

Section 508 Chapter 3: Functional Performance Criteria (FPC)

Criteria	Conformance Level	Remarks and Explanations
302.1 Without Vision	Does not support	<ul style="list-style-type: none">● Custom controls lack accessible name, role and/or state information. Graphical content lacks text equivalents. Form controls are not marked up correctly. Error messages are not easily discoverable. There is no skip link mechanism. Page titles are not descriptive. The page language is not set correctly. Headings are not marked up correctly. The focus order is not logical.
302.2 With Limited Vision	Does not support	<ul style="list-style-type: none">● Content contrasts insufficiently with its background. A small number of components (such as the selected tab within tab navigation widgets, close buttons on modal dialogs, and certain components of the various charts and graphs) are not honored correctly within Windows' High Contrast mode.
302.3 Without Perception of Color	Does not support	<ul style="list-style-type: none">● Content contrasts insufficiently with its background.
