

GOVDESIGNHUB

A DIGITAL DESIGN HUB FOR THE PUBLIC SECTOR

AUTODESK NEWS FOR GOVERNMENT

GovDesignHub traffic readership has proven case studies AND product knowledge is equally desired, but the product knowledge is stale and out of date! As a result, GDH and DLT are increasing the product knowledge aspect of GDH by highlighting Autodesk products with Introductions/Overviews, Deep Dives, and Tips & Tricks.

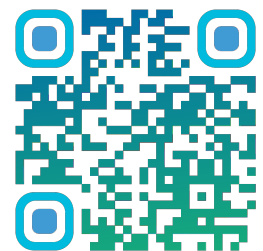

We launched GovDesignHub to celebrate the different ways that these Autodesk solutions are powering innovation, creation and design across the government.

Publication Topics + Subject Matter Expert Interviews

Inventor, AutoCAD, Vault, Civil 3D, Revit, Construction Cloud, BIM Collaborate Pro, Innovyze, and more.

This publication focuses at the ways Autodesk is implemented by experts from the Federal, State, Local, and Education agencies within the U.S. Public Sector.

In this publication, we'll highlight different use cases for digital design software solutions across the government. We'll profile exceptional and innovative ways government organizations and individuals are using these solutions to make a difference. And we'll share best practices for getting the most out of investments in digital design technologies.
