INTRODUCING:

VERITAS™
ENTERPRISE DATA SERVICES
P L A T F O R M

Data is at the heart of everything we do. Every malicious threat aims to exploit this data and regulations govern how this data should be stored, managed and protected. Dealing with these challenges is incredibly difficult to do in an increasingly fragmented, siloed and highly complex IT environment. Starting over is a non-option. So, so how do you get it done?

That's where Veritas comes in.

THREE IMPACTING TRENDS

175
zettabytes by 2025

FACT:
It would take over 2.6 trillion smartphones to store 175ZB of data.

FACT:
A new organization will fall victim to ransomware every 14 seconds in 2019.[1]

300%
YOY increase in ransomware attacks.[2]

52%
of data is still dark[3]

FACT:
It's impossible to prove regulatory compliance when half of your data is dark.
