**CLASSROOM TRAINING**

\*We provide training on all SolarWinds products at our Dallas, TX or Tulsa, OK training facility. We've designed the training to offer Orion NPM and additional modules on an as needed basis.

\*Each training course has extensive hands on lab work and detailed course manual. Each manual provides excellent user reference material. Student's attendance is recognized with a certificate of training completion.

**ON-SITE TRAINING**

\*On-site training is similar to our classroom training, however, delivered at your location. We provide up to 8 students per course and have the option to add additional students. All training courses can be customized to cover specific areas of interest.

**CONSULTING SERVICES**

Corona Technical Services provides SolarWinds Certified Professional (SCP) Engineers that are experienced in helping users to utilize their SolarWinds software quickly and efficiently. We are able to provide a variety of solutions. This can be provided either onsite or remotely.

**Contact Information:**

**For additional information please contact your DLT representative or Jimmy Womack at 70-773-9210. You can also email the sales team at [SolarWinds@DLT.com](mailto:SolarWinds@DLT.com)**

**About Corona:**

Corona Technical Services is a full-range training and support organization for all SolarWinds software products. Corona has been providing worldwide assistance for over 9 years. In addition, the company provides onsite consulting services, and customized development for its customers.
