

5 Ways to SOAR Higher

Slash your incident response time. Leverage automation in your security orchestration, automation and response (SOAR) solutions for real-time situational awareness and lightning-fast threat mitigation.

- 1 Reduce Human Error**
Mitigate risk without causing more pain
- 2 Reduce Complexity**
Accelerate policy deployment through a single, infrastructure-aware integration
- 3 Maintain Continuous Compliance**
Ensure policies are compliant before, during and after deployment and retirement
- 4 Achieve Security Adaptability**
Adapt to evolving threats with evolving mitigation policy
- 5 Implement a SOAR Integration Point**
Scale the security environment through continual enforcement and compliance

FireMon enhances your existing SOAR solutions to unleash its full potential and drive maximum return on your SOAR investment.
