

SECURITY SPARK:

Igniting Governance and Control in Federal Cloud

Lighting the Fuse

94% say their agency is increasingly focused on the importance of data to the mission

And,

90% of Feds believe robust data security will enable their agency to fully realize cloud computing benefits

What steps are agencies taking to secure data in cloud?

Setback to the Finale

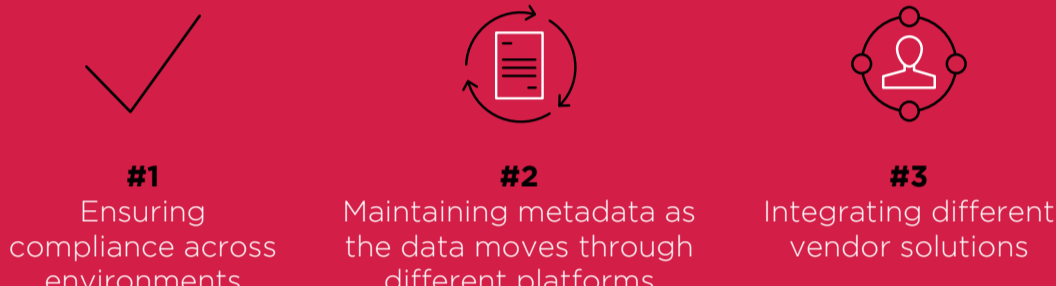

While **79%** of agencies have a formal strategy for protecting data in cloud environments,

just **51%** say their governance policies are “very consistent” across workloads

59% say their agency struggles to secure its data consistently between on-premises and cloud

Top challenges in managing security through the data life cycle:

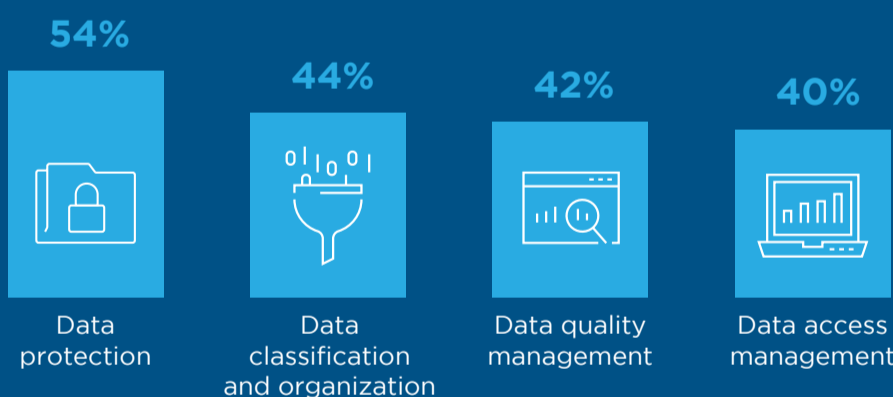

Taking All Precautions

90% agree centralized data control is the key to consistently protecting agencies’ data

And, **95%** are prioritizing cloud data governance improvements over the next five years

Top priority areas:

Off Without a Hitch

What else is needed to consistently control data across cloud and on-premises environments?

- “Visibility into vendors’ secure configurations in real-time”
- “Higher degree of centralized control of the data and where it is going”
- “More qualified technical managers and an increase of stakeholder support”
- “Better education and communication of our security policies and tools”
- “Role-based access with real time reliability/verifiability”
- “Automation to better control data across the cloud”

Cloudera’s Shared Data Experience (SDX) enables safe and compliant self-service access to data and analytics.
