

Data At Scale

Collect, Store, Govern, and Analyze Data at Scale With the Help of DLT and AWS

Get Insights Faster With a Broad Set of Analytic Tools

Data and data sources are growing rapidly both in volume and diversity. This data also needs to be securely accessed and analyzed by any number of applications and people. The size, complexity, and varied sources of data means that government agencies & educational institutions need solutions that can help them analyze data at the scale and flexibility they need.

Keep Your Data Secure

Focus on deriving insights from your data instead of worrying about security. Leverage tools that meet the requirements of the most security-sensitive organizations with AWS and DLT Solutions. AWS data and analytics services facilitate data warehousing, big data processing, real-time analytics, and operational analytics. These use cases work to collect, store, analyze, and visualize all data in real time. Many AWS services work to automate time-consuming tasks for these use cases.

Benefits of data and analytics solutions on AWS

Visualize Insights Faster

Gain a broad set of analytics tools at a lower cost to help you get mission-driven insights faster.

Secure

Keep your data safe by leveraging tools that meet the requirements of the most security-sensitive organizations.

Flexible and Scalable

Collect, store, categorize, and analyze your data at scale, with services that meet your unique needs.

AWS Analytics Services

Use cases such as interactive analysis, big data processing, data warehousing, realtime analytics, operational analytics, dashboards, and visualizations.

Use Cases

Data lakes: Migrate massive volumes of unrelated data to a data lake on AWS, where it can swiftly and simply be leveraged for critical, mission-driven insights

Deliver insights: Migrate and transform data on Amazon Redshift and use Amazon QuickSight to provide customers with self-service dashboards.

Real-time analytics: Turn streaming data into actionable insights to accelerate decision-making using AWS Partner services built on Amazon Kinesis.

DLT Solutions is the premier government solutions aggregator that specializes in understanding the Cloud needs of the federal, state, local and education markets. Learn more: <https://www.dlt.com/aws>
