

From Puddles to Clouds:

Early Steps to SLED Cloud Adoption

MeriTalk, in partnership with AWS and DLT, explored the benefits of cloud migration and critical steps state, local, and education (SLED) organizations are taking to modernize.

Clouds in the Forecast

Top cloud drivers:⁴

Storm Brewing

While **96%** see benefits to modernizing legacy applications with cloud¹, most government organizations have no more than **20%** of their workloads in cloud⁵

Top barriers:⁵

Early Steps to Adoption

How are state and local government organizations preparing data for cloud migration?⁶

Additionally, **80%** of state CIOs provide support and governance for agencies' app migration⁴

Optimizing the Cloud Cycle

So far, **84%** of public sector hybrid cloud users report improvements in their ability to meet their mission⁶

Benefits of modernizing with cloud:⁷

State CIO Perspective:

“ It's really about the future – the ability to have agility, cost control, and ultimately deliver government services to citizens in the most effective manner possible and in the way they're accustomed to receiving services from the private sector⁸ **”**

DLT Solutions, a subsidiary of Tech Data, is the premier government IT solutions aggregator specializing in the U.S. Federal, state, local, and education markets. As an Advanced Consulting and Managed Services Partner for AWS, DLT helps make the path seamless and cost effective for customers.
