GLOBAL RISK AND ADVISORY SOLUTIONS

VULNERABILITY ASSESSMENT

Ignyte helps secure your enterprise resources.. Our Vulnerability Assessment is focused on information security vulnerabilities associated with network devices, host systems, and applications on a customer's external and internal infrastructure. A vulnerability assessment is normally a component of a larger security review, but may also be a standalone service

PENETRATION ASSESSMENT

Ignyte helps secure your enterprise resources.. Our Penetration Assessment is a focused and targeted "hacking" attack simulation to identify, evaluate, and demonstrate a particular vulnerability in your business enterprise system.

ISO27001 ASSESSMENT

Ignyte provides solutions which serve to enable your organization to reach the level of qualification for certification with the International Standards Organization (ISO27001). Our ISO27001 Assessment is an independent review of your current enterprise information security infrastructure. We provide a comparison of the minimum essentials necessary to achieve certification with reference to your current state of enterprise security. Our solution helps you rapidly and efficiently achieve your security management objectives for ISO17799 compliance.

GRAMM-LEACH-BLILEY ACT COMPLIANCE ASSESSMENT

Ignyte will enable you to have effective enterprise security policies, standards, and procedures that are compliant with the Gramm-Leach Bliley Act of 1999 (GLBA). Our GLBA Compliance Assessment is an independent assessment of your business's current administrative procedures, physical and technical safeguards within your business infrastructure. Our solution helps you rapidly and efficiently achieve your security management objectives for GLBA compliance.

SECURITY POLICY FRAMEWORK ASSESSMENT

Ignyte provides solutions to enable your organization to have up-to-date, effective business enterprise security. Our Security Policy Framework Assessment is an independent assessment of your current business information security policies, standards, and procedures. Our solution compares your current security state with that of your business objectives to create a framework report. This concise high-level and comprehensive report is the foundation from which to plan a security infrastructure that can lower risks and threats to your business enterprise.

FERC COMPLIANCE ASSESSMENT

Ignyte will enable you to have effective enterprise security policies, standards, and procedures that are compliant with the Federal Energy Regulatory Commission (FERC) Security Standards for Electric Market Participants. Our FERC Compliance Assessment is an independent assessment of your current logical and physical security safeguards within your infrastructure. Our solution helps you rapidly and efficiently achieve your security management objectives for FERC compliance.

SARBANES-OXLEY COMPLIANCE ASSESSMENT

Ignyte will provide your enterprise with security policies, standards, and procedures that are compliant with the Sarbanes-Oxley Act of 2002. Our Sarbanes-Oxley Compliance Assessment reviews your current business administrative procedures and policies with the goal of improving the accuracy, reliability and timeliness of your financial information. Our solution helps you rapidly and efficiently achieve your management and security objectives for Sarbanes-Oxley compliance.

HIPAA COMPLIANCE ASSESSMENT

Ignyte will enable you to have effective enterprise security policies, standards, and procedures that are compliant with the Health Insurance Portability and Accountability Act (HIPAA). Our HIPAA Compliance Assessment is an independent assessment of the current administrative procedures, physical safeguards, and technical safeguards.
