Business outcomes

Benefitting your customers

Alongside our product features Trilio is directly benefitting your customers non-function-requirements ,such as external regulatory and mandatory internal requirements as well as internal business goals.

Secure your employee's productivity and the ability to generate revenue and improve your product/service for their customers

Improve TCO Minimize internal labor costs for solving audit findings and daily backup by having backup automation and shared responsibility, as well as centralized reporting in place – Cost-benefit, can have a positive impact on your end customer unit price and margins

Customer benefits: By using Trilio you will strengthen your SLA towards your customers and internal entities

Don't lose business to competition

Appropriate BCM processes and tooling will prevent you losing business to competitor and keep your reputation high

Keep your risk budget in check by having an answer to data loss and ransomware attack scenarios incl. evidence
