THREAT
INTELLIGENCE FEEDS

Well-Fed Intelligence from Bambenek Consulting Ltd.

STAY CURRENT ON ATTACKER STRATEGIES

Sinkhole IP Feed

A manually-curated list of over 1,500 known sinkholes. The feed is used to capture traffic headed toward criminal destinations. Catch traffic headed toward them, and you know you have an infected machine.

DGA Feed

A self-curating feed that monitors malicious networks to observe current criminal activity. All domains are actionable. Live data of between 750 and 1,500 domains. which are used by 65 malware families and nearly 1 million domains. Limited to current relevance. High-confidence data, extremely low false-positives.

MaldomainML

A feed based on proprietary machine learning and analytic methods of DNS telemetry developed in Bambenek Labs. Identifies malware and phishing hostnames used primarily for criminal purposes. Data is extremely safe to use to proactively protect networks.

DATA YOU CAN TRUST

Since their public release in 2013, over 2,000 organizations spanning 140+ countries have come to rely on these feeds in their security protocols and products. Both feeds are integrated with most threat intelligence platforms.
