

Streamline Training. Strengthen Oversight. Support Compliance.

Whether training a statewide workforce or managing mandatory certifications, **Anthology® Registration and Management for Blackboard** helps government agencies simplify training administration, increase visibility, and ensure compliance—all in one centralized platform.

Take the Pain Out of Public Sector Training Management

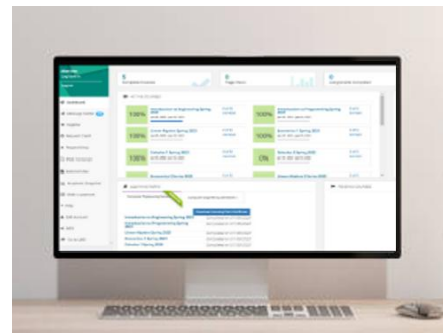

Anthology Registration and Management gives government agencies the tools to centralize training, manage enrollments, and track compliance—across in-person, online, and hybrid learning environments.

Why Government Agencies Choose Anthology Registration and Management

- ✓ **Unified Training Hub**
Centralize registration, delivery, and tracking for internal training, compliance programs, and CE initiatives.
- ✓ **Self-Service Access for All Users**
Empower learners—staff, contractors, partners—with branded portals for registration, payment, and credential access.
- ✓ **Automated Compliance Tracking**
Configure learning paths, assign training deadlines, and issue certificates or transcripts upon completion.
- ✓ **Manager Dashboards**
Give supervisors real-time visibility into team training status, overdue items, and progress.
- ✓ **TX-RAMP Level 2 Certified**
Built with government-grade security to protect regulated and confidential data.

What You Can Do with Anthology Registration and Management

- Manage courses, programs, and training paths across multiple departments
- Set prerequisites, approval workflows, and enrollment caps
- Create custom certificates, badges, and learning transcripts
- Automate reminders, approvals, and activity-based notifications
- Seamlessly integrate with Blackboard, SIS, LMS, CRM, and finance systems

“ This dashboard provides a one-click overview of team training. Managers can approve requests and instantly see if anyone is out of compliance.”

— **Lindsey Heister**, *California Department of Social Services*

Built to Serve Public Sector Training at Every Level

Anthology Registration and Management adapts to the diverse needs of government agencies—from local municipalities to large state and federal institutions. Whether you're delivering required onboarding, continuing education, or certifications for compliance, Anthology provides a scalable solution that grows with your programs.

Workforce Development Programs

Equip employees and contractors with the skills they need—track outcomes, issue credentials, and meet funding or grant reporting requirements.

Cross-Agency Credential Portability

Track and transfer transcripts, training histories, and digital credentials across departments, programs, or agency partners.

Continuing Education & Public-Facing Offerings

Offer CE programs to the public or other agencies with e-commerce functionality, learner portals, and transcript management.

Compliance & Mandated Training

Ensure staff complete required courses by automating assignments, reminders, and certificate generation tied to agency policy or legal mandates.

Hybrid & Experiential Learning

Manage non-traditional formats like clinical rotations, internships, field training, and virtual instruction—all from one platform.

Leadership & Succession Training

Support long-term agency stability by managing leadership development programs, tracking skill progression, and certifying readiness for advancement through structured learning paths.

Security Benefits of Anthology® Registration and Management

TX-RAMP Level 2 Certified

Trusted to handle confidential government data under Texas DIR requirements.

ISO 27001 + SOC 2 Type II Compliant

Enterprise-grade data protection and operational controls.

GDPR-Compliant

Ensures international privacy and data transparency standards.

Role-Based Access

Control visibility and permissions by administrator, manager, or user type.

Ensure accessibility across systems and platforms

Anthology® Ally supports a wide range of learning management systems—including Anthology® Blackboard, Instructure Canvas, D2L Brightspace, and Moodle—used by government agencies for workforce training and professional development. It integrates seamlessly into existing workflows to automatically identify accessibility issues and recommend improvements.

Ally also extends its capabilities to public websites, scanning unlimited domains, subdomains, and embedded content to enhance readability, usability, and compliance with digital accessibility standards—ensuring equitable access to information and services for all citizens.

Secure

Anthology Ally has achieved **TX-RAMP Level 2 certification**, affirming its compliance with stringent security standards required for cloud services handling confidential or regulated data within Texas state agencies. This certification ensures that Ally meets the necessary criteria for processing, storing, or transmitting sensitive information in moderate or high-impact systems, as defined by the Texas Department of Information Resources (DIR).

Empower choice

Deliver inclusive digital services by giving employees, constituents, and trainees the flexibility to access content in the format that best meets their needs.

Anthology® Ally automatically generates a wide range of alternative formats—such as audio, translated text, ePub, and tagged PDFs—using machine learning to ensure a seamless and accessible experience across all devices and abilities.

Gain Actionable Insights and Guidance

Anthology Ally scans digital content in real time to detect and score accessibility issues across internal training systems and public-facing materials. Content creators and editors receive step-by-step guidance to remediate problems, along with AI-generated alternative text for images—enabling continuous improvements aligned with Section 508, WCAG, and ADA Title II best practices.

Monitor and Demonstrate Progress

Stay ahead of evolving accessibility standards with detailed dashboards and reporting tools. Anthology Ally equips agencies with the data needed to track improvements over time, identify areas of risk, and support compliance documentation—empowering data-driven decisions that strengthen digital
