All Solutions Include:	• Performance Analytics • Workflow Data Fabric

“

We're very pleased to partner with ServiceNow on the Government Transformation Suite. To enable efficient delivery of client mission outcomes, we're packaging up our most successful deployments from 30+ Federal agencies and the private sector to allow any Federal agency to rapidly deploy proven solutions.”

– Ron Ash, CEO
Accenture Federal Services

“

Intact is thrilled to be a key partner in the Government Transformation Suite initiative, offering cutting-edge solutions to help U.S. government agencies rapidly expand their ServiceNow capabilities and meet the new administration's priorities.”

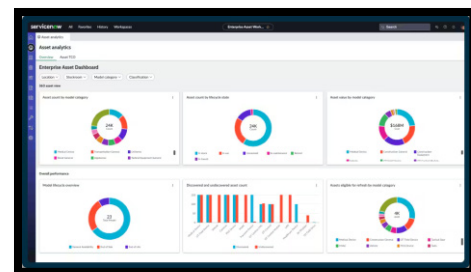

– Brian Crosby
Chief Growth Officer
Intact Technology

Solution Overview

1. Enterprise Asset Management

Cut costs and tune performance

Federal agencies seek ways to optimize performance and costs for their extensive asset estates. This solution helps agencies gain visibility across their inventory of assets including: hardware, software, and other types of enterprise assets (such as real estate, fleet, and equipment). With this visibility, they can unlock cost savings opportunities in weeks, not months. Further, they can attain quick insights into true program costs for more informed decision making.

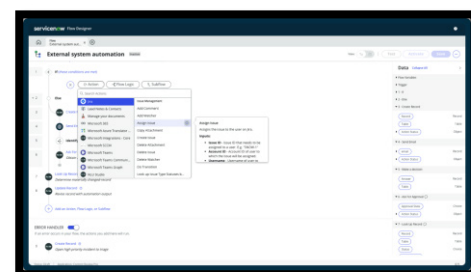

1: Enterprise Asset Dashboard

2. Worker Productivity

Streamline with one portal

Centralizing all services for intra and inter-agency work helps remove inefficient "swivel-chairing" between multiple systems and domains in a manual and error-prone process to get work done. By adding AI-driven workflows, true self-service capabilities, and more transparency into current processes, everyone works smarter and without swivel-chairing among systems and screens.

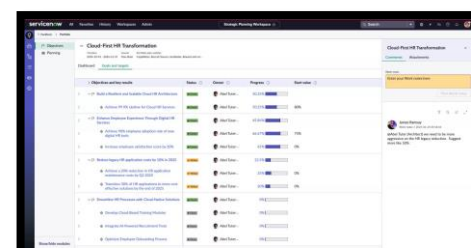

2: Automation Setup Portal

3. HR and RTO (Return to Office)

Streamline HR and increase effectiveness

Transform cumbersome HR processes into fast, AI-enabled workflows. Simplify the process of government workers coming back to the office with everything they need for optimal performance. Improve HR team efficiency by speeding up processes for onboarding, off-boarding, and everything in between.

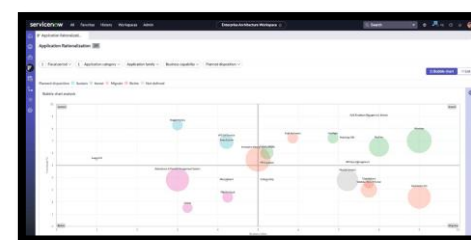

3: HR Transformation Dashboard

4. Application Rationalization

Streamline and consolidate your application footprint

IT leaders aim to reduce costs and modernize capabilities amidst application sprawl. This solution helps to remove redundancies in the application footprint without affecting services. By revealing which apps are not used, out of compliance, or aged, a roadmap for a cleaner, more manageable portfolio emerges.

4: Application Reconciliation Dashboard

Powerful Tools Across All Solutions

ServiceNow's Performance Analytics and Workflow Data Fabric products are included with each solution.

- **Performance Analytics:** Anticipate trends, prioritize resources, and continuously improve with real-time analytics.
- **Workflow Data Fabric:** Power all your workflows, AI agents, and analytics with real-time access to data from any source. Cut costs with AI-powered automations and ironclad governance.
