

Compliance Monitoring

A better way to stay connected

Ensures individuals under supervision can more easily stay connected to a government program in a low-profile way.

With Samsung's mobile device at its core, the Compliance Monitoring solution delivers greater capability in a multi-functional device.

Individuals have the tools they need in the palm of their hands to thrive, while navigating the system and staying accountable. From tracking health conditions to monitoring compliance with agency sanctions, smartphone solutions provide quick access to community resources and enhanced communication services that will advance lives.

Key features

Multi-functional mobile device gives individuals under supervision access to the social services they need

Biometric integration for identity and verification (fingerprint and face ID)

GPS tracking in kiosk mode to monitor individual whereabouts

Easy communications and videoconferencing for agent interactions, meetings and court hearings

Knox security platform from the chip up provides the endpoint security needed

Knox Manage offers mobile device and solution management

Use cases

Immigration and customs enforcement

Provide immigrants who have crossed the border with a mobile device pre-configured with the information they need to navigate the immigration process and stay better connected to the government program.

Justice Situation Monitoring

As a more cost-effective alternative to the ankle bracelet for individuals in a justice-involved situation, a multi-functional mobile device enables GPS tracking along with videoconferencing and messaging communication to better comply with their conditions for release.

Health disease tracking

Track patterns of disease among individuals entering the country and domestically to pinpoint any health conditions that require follow-up care.
