

SAMSUNG

DeX in Vehicle

Always-on connectivity that maps to the flow of work

The DeX in Vehicle solution provides seamless field-to-vehicle-to-office connectivity.

The powerful mobile device offers a PC-like experience and eliminates the full cost of maintaining a rugged Windows PC in vehicle and a separate PC in station/office, limiting the number of devices needed.

The solution integrates computer aided dispatch (CAD), records management, GPS and other productivity software.

Key features

One mobile device to power seamless field-to-vehicle-to-office computing, replacing the need for PCs

S Pen captures signatures easily and digitizes pen to paper workflows

5G

5G connectivity for maximum speed and security optimizes ability to work on-the-go

Software and hardware partners provide the full range of tools needed, with the ability to integrate it for officers in one system set-up

Highest security with defense-grade Knox security platform built-in, along with Knox Suite for device management

Long-lasting battery means use in the field without interruption

Use cases

Law enforcement

Gain greater situational awareness for whatever the mission demands with the same technological efficiency whether the officer is in the field, the vehicle or the office.

Fire services / emergency responders

Ensure firefighters or emergency responders can operate seamlessly from field to vehicle to office, with a technology solution that keeps them connected at all times.

Probation & Parole Agents

Give agents the technological edge and mobile flexibility required to meet the mission.
