

AI-POWERED MODERNIZATION. MISSION READY. POLICY ALIGNED.

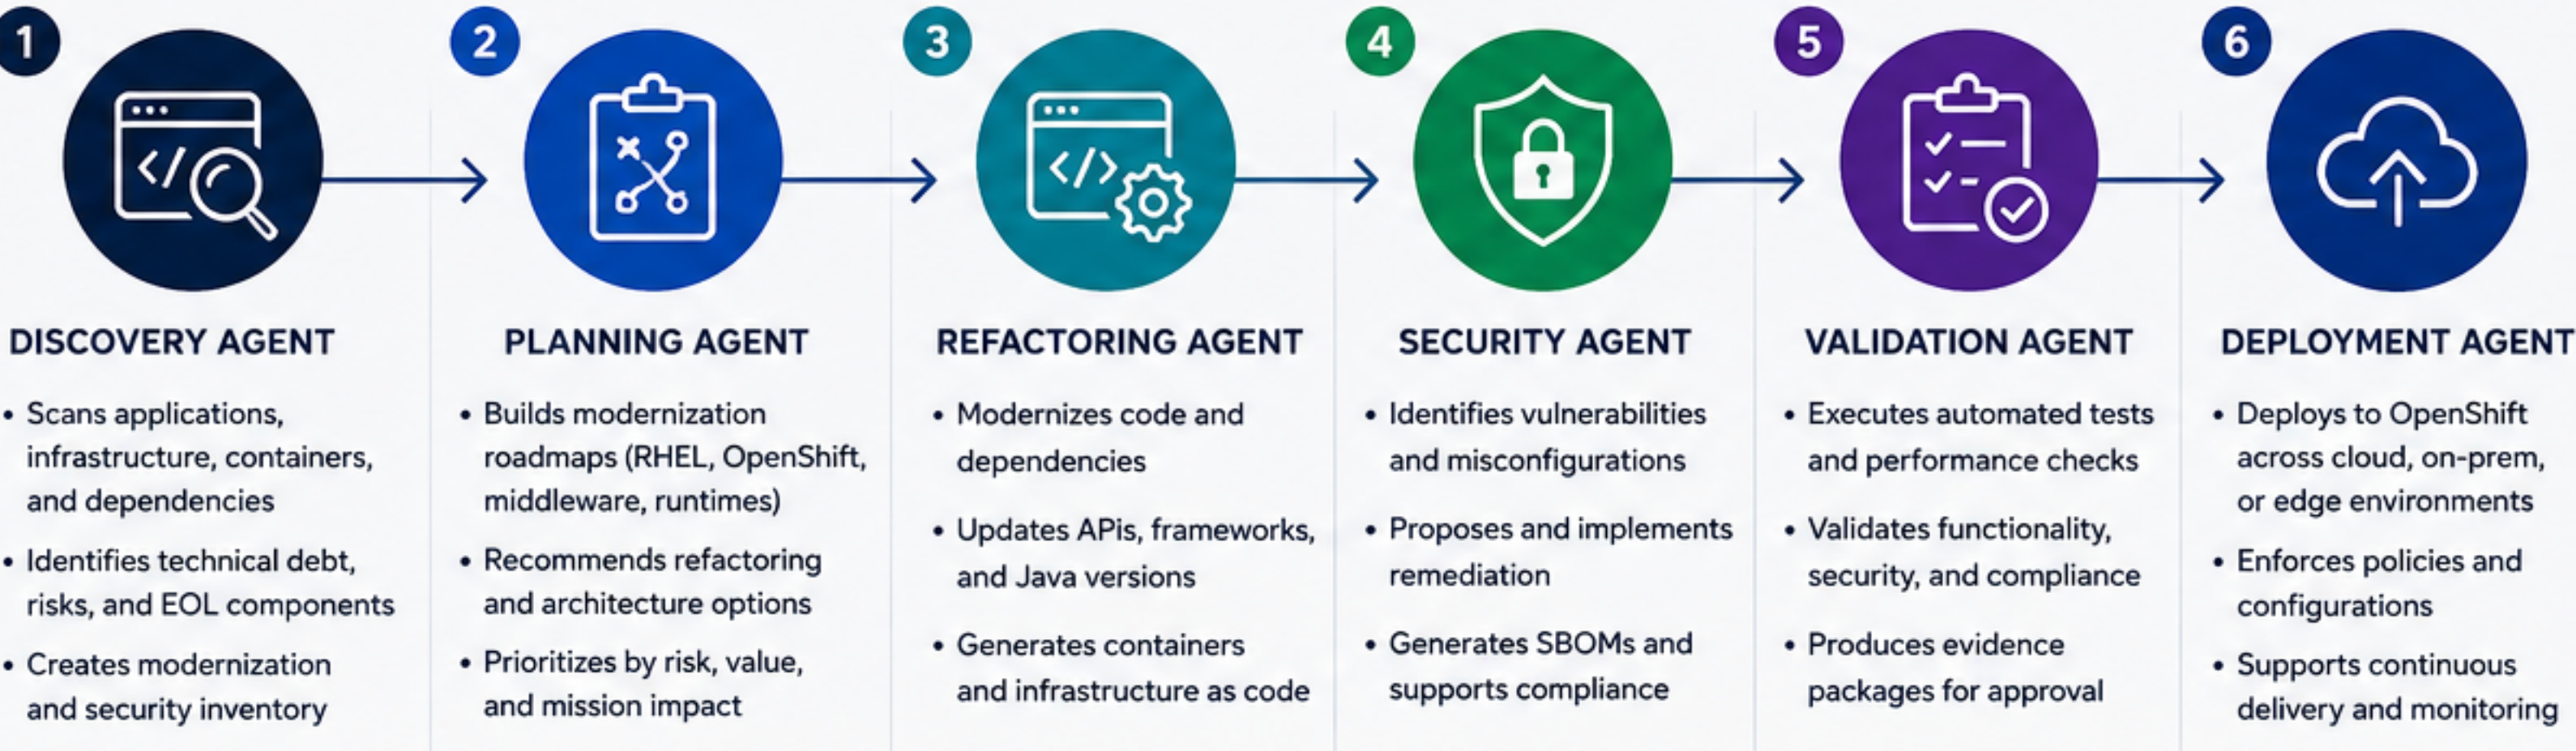

The 2026 Executive Order on Advanced AI Innovation and Security calls for the acceleration of AI adoption, cybersecurity, and modernization across national security and government systems.

EXECUTIVE ORDER PRIORITIES

- ✓ Accelerate AI innovation and adoption
- ✓ Strengthen cybersecurity and system resilience
- ✓ Modernize legacy systems and reduce technical debt
- ✓ Ensure responsible, secure, and trustworthy AI
- ✓ Protect U.S. technology leadership and mission advantage

AGENTIC AI WORKFLOW FOR SOFTWARE MODERNIZATION

MISSION IMPACT

MODERNIZE FASTER
Reduce timelines from years to weeks

STRENGTHEN SECURITY
Continuously identify and remediate risks

LOWER RISK & COST
Automate repetitive work and reduce technical debt

IMPROVE MISSION READINESS
Deliver trusted, resilient applications at mission speed

BUILT ON A TRUSTED, SECURE FOUNDATION

Red Hat AI

Enterprise-grade AI platform for secure, responsible, and scalable AI deployments

Red Hat OpenShift

Consistent, secure platform across cloud, on-prem, and air-gapped environments

Security & Compliance

Supports RMF, FedRAMP, NIST, and other regulatory requirements

Human-in-the-Loop

AI agents with human oversight, governance, and auditability

Sovereign & Resilient

Designed for national security workloads and supply chain assurance

**AI-POWERED.
HUMAN-GOVERNED.
MISSION FOCUSED.**

Accelerating modernization in support of the 2026 Executive Order on Advanced AI Innovation and Security.
